# How AZCoin Works

## 1. Staking & Fund Allocation

Users stake assets (USDT, BNB, FIL, LINK, etc.), and funds are strategically allocated for profit generation.

## 2. Profit Generation

- **AI & High-Frequency Trading (HFT):** Trading on Binance, HyperLiquid, Bybit, etc.
- **Yield Farming & Liquidity Provision:** Earning fees from DEXs (Uniswap, PancakeSwap, GMX).
- **AI & Blockchain Investments:** Funding innovative startups for long-term growth.

## 3. Daily Profit Distribution

70% in the original staked token, 30% in AZC (AzCoin).

## 4. Maxout Limit – 400% Cap

Once total earnings (staking + commissions) reach **400% of the initial stake**, a new stake is required to continue earning.

# Earnings & Commission Distribution

## How Earnings & Commissions Are Paid

### Daily Interest Claim:

- Users can claim their staking rewards **every 24 hours**.
- Max earnings limit 400% of Your Staking Position.
- The rewards are calculated based on the staked amount and the selected plan.
- Interest is distributed in a **70/30 ratio**:
- **70%** in the original staked token (e.g., FIL, BNB, etc.).
- **30%** in **AZC (AzCoin)**, which has a fixed exchange rate:
- **1 AZC = 0.01 USDT**.

# Earnings & Commission Distribution

## How Earnings & Commissions Are Paid

### Profit-Sharing Commission

- When a user claims their interest, a percentage of their earnings is shared with 10 uplines based on the following structure 10 level: 20%, 10%, 5%, 5%, 5%, 1%, 1%, 1%, 1%, 1%.

### Leader Performance Commission

Leaders earn **Leader Performance Commission** whenever **any downline member** (at any level) claims their staking rewards. This commission is based on the leader's rank and applies to the **Profit-Sharing Commission** structure.

🔥 **The higher your rank, the more you earn!**

💡 All commission is also distributed in the 70/30 ratio (Original Token + AZC).

# Max out Limit in Staking & Commission Earnings

The **Maxout Limit** is the maximum amount a user can earn from staking rewards and commissions before they need to **reinvest** to continue earning.

## Max out Staking

Each staking position has a **max earnings cap of 400%** of the initial investment. This includes:

- ✓ **Staking rewards** (daily interest)

## Maxout Commission Earnings

- ✓ **Direct referral commissions**

- ✓ **Profit-sharing commissions**

- ✓ **Leader performance commissions**

## ⚡ Why is Maxout Important?

The Maxout system encourages **continuous investment** while ensuring fair distribution of rewards across the network. To keep earning, **manage your staking positions wisely and reinvest when needed!** 🚀

# FAQs (Frequently Asked Questions)

## 1. Which tokens can I stake?

Currently, we support staking of USDT, FIL, LINK, and BNB. We regularly evaluate and may add more tokens based on market conditions and community demand.

## 2. Is there a lock-up period?

No, there is no lock-up period. You can withdraw your earnings daily. However, each stake will automatically stop once it reaches 400% of the initial investment.

## 3. How are profits distributed when I claim?

Claimed profits are paid in 70% of the original token staked and 30% in AZC tokens (1 AZC = 0.01 USDT, will add liquidity later). Additionally, uplines receive profit-sharing commissions across 10 levels: 20-10-5-5-5-1-1-1-1-1%.

## 4. Can I add more funds to an existing stake?

No, each stake is treated as a separate position with its own MPY rate and 400% cap. If you want to stake more, you'll need to create a new staking position.

# FAQs (Frequently Asked Questions)

## 5. Can I add more funds to an existing stake?

No, each stake is treated as a separate position with its own MPY rate and 400% cap. If you want to stake more, you'll need to create a new staking position.

## 6. What if I miss a daily profit claim?

You can claim profits anytime after 24 hours, but only one claim is allowed per cycle. Any extra time carries over to the next claim (e.g., claiming after 30 hours counts 10 hours toward the next cycle).

## 7. What blockchain does the platform use?

Our platform operates on the Binance Smart Chain (BSC), which provides fast transactions and low fees, making it ideal for staking operations.

## 7. How does the platform generate profits for staking rewards?

AZ Coin reinvests staked assets into **high-liquidity trading, AI-driven investments, and early-stage startup funding**. The profits generated are redistributed to investors through staking rewards and commissions.
